

PRE-TEMP (T151)® and RFID

Two functions in one tag

Identification and temperature measurement at transport crucible

Temperature measurement with optional identification

Knowing the temperature values of the whole process, starting from heating up to delivery to the customer, means high delivery quality!

PRE-TEMP® with ram protector

PRE-TEMP® at crucible

Identification and localization of the heat retention and transport crucible. Determination of quality status and history.

Tag at crucible

Transport crucible at the reading station

The user will be featured nearly all operational data, through the mentioned functional principle!
