

WHO WE ARE

Beside more than four decades of experience and stability in measurement and control technology, we can look back on a number of innovative ideas and products. Value-based management, which will be implemented with common sense and unconditional quality as well as collaborations, innovations and investments have made us to what we are today.

WHAT WE WANT

Putting people first - we maintain long-term and productive relationships within the fiwa)group and externally with our customers, suppliers and partners. We want to continue growing in the long term and thereby achieve the highest possible customer satisfaction. We want to achieve our aim with optimally trained employees, that deal motivated and powerful daily tasks and challenges. Very important is here a sustainable economy and an innovative mindset.

fiwa)group PORTRAIT

Since 1972 fiwa)group is an engineering company and full-service provider of engineering services and planning, especially in the areas of process automation, control systems, measurement and control technology, electrical engineering, building services and machine / facility automation / IT.

We have been providing services to the process and manufacturing industries for more than 40 years.

Our range of services starts with the detailed advice to our customers on the Pre-Basic, through to detailed planning and optimisation of production plants.

The fiwa)group has its own subsidiaries in Germany, Austria, Romania and China. Accompany with a total of approximately 200 employees we serve our customers worldwide. Our customers include both end users as well as well-known plant manufacturers in various industries, with whom we have strong customer-supplier relationships for years.

MOVE 2025 Positioning of fiwa)group

www.fiwagroup.com

MOVE 2025

Fokus the target - well equipped/prepared for the future

CUSTOMER/CLIENTS

- An open and honest communication with our customers and partners is a matter of course
- We seek and maintain long-term partnerships
- We offer integrated solutions and complete packages
- We support our customers in optimising their business processes
- We stand for unconditional quality
- We accompany our customers throughout the world

SUSTAINABILITY

- We rely on long-term, permanent employees
- We live staff redundancy
- Targeted expertise structure according to market demands is always in focus
- Professional qualifications and continuous technical and personal development are a must for our quality standard

MOVE 2025

Das Ziel im Fokus

EMPLOYEES

- We express appreciation to employees
- We provide a familiar working environment
- We have and live flat hierarchies
- We attach great importance to team building activities

INNOVATIONS

We are patentees of:

- Back pressure independent gas dosing systems for melting aluminum / non-ferrous metals and silicon production
- Furnace weighing (to 800t exactly 0.03-0.1%, up to 0.5-3% accurate 1.600t)
- Crucible weighing and identification
- Crucible-circular weighing at any time, also during rotation

Two patent applications running on:

- Mobile temperature sensing in high-temperature range in the aluminum industry
- Level measurement systems

Smart Factory (industry 4.0):

- We provide solutions for production-related programming and connection to higher level ERP systems
- We have innovative teams assembled in the field of machine and facilities automation and classical IT
